

Supreme Power Equipment Limited

TRANSFORMING Capacity Into Growth

Investor Presentation

This presentation and the accompanying slides (the Presentation), which have been prepared by **Supreme Power Equipment Limited (Supreme, SPEL, The Company)** solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment what so ever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantee of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict.

These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks.

The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.

Mr. Vee Rajmohan
Chairman & Managing Director

“

Q1 FY27 has been an encouraging start to the year, with our topline growing by over 37% year-on-year, underpinned by healthy execution momentum and sustained demand for our transformer solutions. We are particularly pleased with the strength of our order inflows during the quarter, having secured 10 orders aggregating ₹195.64 Cr. Our entry into Maharashtra further broadens our geographic presence and reflects our continued efforts to build a stronger and more diversified customer base across key markets.

While margins witnessed some moderation during the quarter, profitability remained healthy and we continue to maintain a disciplined approach towards pricing, procurement and operational efficiency. As the scale of our operations increases, our focus remains on improving execution efficiencies and deriving greater operating leverage from our enhanced manufacturing capabilities.

Our current consolidated order book stands at approximately ₹590.06 Cr, providing healthy revenue visibility over the coming quarters. Looking ahead, our immediate priority is the timely execution of this order book while progressively ramping up utilisation at our new manufacturing facility. With enhanced capacity, a strong order pipeline and an expanding geographic footprint, we remain focused on scaling the business in a measured manner and delivering sustainable and profitable growth over the medium to long term

”

Geographic Expansion

Expanding presence across Karnataka, Kerala, and other Pan India markets

Supreme Power Equipment Limited (SPEL) is a transformer manufacturing company with over three decades of experience, delivering integrated solutions across power generation, transmission, distribution, and renewable energy segments. With an expanded manufacturing capacity of ~9,000 MVA and capabilities up to 200 MVA / 220 kV, the company is strategically positioned to address higher-value, large-scale projects. Backed by strong relationships with utilities and EPC players, a diversified product portfolio, and a growing order book, SPEL is entering a new phase of scalable growth driven by capacity expansion, product mix improvement, and favorable power sector tailwinds.

Mission

The Company strives to achieve Customer Satisfaction through providing quality products effectiveness of the quality management system. at the right time.

Vision

The Company aims for 100% delivery performance on a continual basis. Work towards achieving nil rejection at customer end.

A Timeline Of Supreme Power Equipment

2000

New management improved design, manufacturing, and marketing capabilities, increasing production capacity.

2015

Expanded manufacturing and testing capabilities up to 25 MVA and 132 kV transformers.

2024

Crossed ₹113 Cr revenue milestone and began focusing on larger power transformers.

2026

Commenced operations at new Kannur facility, enabling higher capacity transformer manufacturing.

1994

Founded as a partnership firm, entering the transformer manufacturing business.

2005

Incorporated as Supreme Power Equipment Private Limited, formalizing business operations and structure.

2023

Converted into Public Limited Company and listed on NSE Emerge Platform. Received Vendor Approval From KPTCL

2025

Received vendor approval from Kerala State Electricity Board, expanding geographic presence.

Vee Rajmohan

**(Chairman & Managing Director
| 30+ Years Experience)**

Founder of Supreme Power Equipment's and instrumental in its evolution from a partnership firm to a full-scale transformer manufacturer

Started career as Works Manager at Venus's Herbo Aromatics, leading end-to-end plant setup from construction to commercial operations

Strong hands-on experience in machinery erection, installation, testing, and commissioning of industrial units

Established the business in 2001 catering to Tamil Nadu Electricity Board, building early utility relationships

Led transition to private limited structure in 2005 with capabilities to manufacture transformers up to 25 MVA / 132 KV

Continues to drive overall operations, execution, new business development and long-term growth strategy

K V Pradeep Kumar

**(Whole Time Director
| 30+ Years Experience)**

Core member in building the company since inception with strong technical and operational leadership

Began career at Indotech Transformers (PROLEC GE), rising to Head – Quality Assurance

Led design, production, and testing of transformers up to 100 MVA / 230 KV class

Expertise in specialized transformers including windmill and inverter duty transformers

Played a key role in supplying transformers to wind and solar power projects

Strong capabilities across quality control, production, procurement, and technical execution

Devaraja Iyer Krishna Iyer

**Non-Executive, Non-Independent
Director | 46 Years Experience**

Extensive experience in electrical power systems with expertise in high-voltage and large-capacity transformers

Trained with Hitachi (Japan) and AREVA (Germany) with strong exposure to global manufacturing and design standards

Held leadership roles across TELK, AREVA, ECE Transformers, and Prime Meiden, driving design, production, and plant operations

Perumal Ravikumar

**Independent Director | 33 Years
Experience**

Strong background in talent management, employee relations, and organizational strategy across large-scale operations

Managed business functions across PAN India and Asia-Pacific regions with focus on performance and execution

Expertise in quality sourcing, administration, and people management with prior exposure to insurance industry

Saimathy Soupramanien

**Independent Director
| 25+ Years Experience**

Experienced Company Secretary and legal professional with strong corporate governance and compliance expertise

Practicing Company Secretary with in-depth knowledge of regulatory, legal, and financial frameworks

Brings multi-disciplinary exposure across legal, accounting, finance, and taxation

Supreme Power Equipment Limited is engaged in the **design, manufacturing, and supply of power and distribution transformers**, catering to power transmission, distribution, renewable energy, and industrial infrastructure projects.

Customer Segments

Government & Utilities

State electricity boards, PSUs

In Q1 FY27 Contributed
₹20.66 Cr (40.32%) of revenue

Private Sector

EPC contractors, renewable developers

In Q1 FY27 Contributed
₹ 30.58 Cr (59.68%) of revenue

Industrial

Manufacturing & infrastructure players

Execution Model

The company receives orders through **tenders, EPC contractors, and direct industrial orders.**

Products are **custom-designed as per customer technical specifications.**

Manufacturing is done **in-house.**

Transformers are supplied and installed at customer project sites.

The company also provides the Transformer Servicing Facility to customers

Revenue Drivers

- Order inflow from EPC & utilities
- Execution of transformer supply contracts
- Increasing share of high-capacity transformers
- Growth in renewable & transmission projects

Competitive Positioning

- Strong relationships with utilities & EPC players
- Wide product portfolio across multiple transformer types
- New facility enabling entry into higher MVA transformer segment
- Focus on quality, execution, and timely delivery

Power Sector Value Chain & SPEL's Role

SPEL's transformers are used across the entire power value chain – from power generation to end-user electricity distribution.

In-House Capabilities:

- ❑ Core & coil manufacturing
- ❑ End-to-end transformer assembly
- ❑ Integrated testing & QC
- ❑ RTCC / control panel assembly

Benefits of In-House Manufacturing:

- ❑ Superior quality control
- ❑ Faster execution cycle
- ❑ Cost efficiency
- ❑ On-time delivery

Thirumazhisai, Tamil Nadu

Location: SIDCO Industrial Estate, Chennai
Capacity: ~2,500 MVA p.a.
Rating: Up to 25 MVA | 132 kV
Facility Size: 17,876 sq. m.
Products: Power & Distribution Transformers
Utilization: 70-80%

Kannur, Tamil Nadu

Location: Thiruvallur District
Capacity: 6,000-6,500 MVA p.a.
Rating: Up to 200 MVA | 220 kV
Investment: ~₹100 Cr
Operations: Commercialized Feb 2026
Strategic Role: Entry into High Voltage & Large Power Segment

**Total Capacity
9,000 MVA**

Entry into high-capacity, high-voltage transformer segment with higher entry barriers

Particulars	Earlier	Now
Capacity	2,500 MVA	9,000 MVA
Transformer Rating	Up to 50 MVA	Up to 200 MVA
Voltage	Up to 132 kV	Up to 220 kV
Market	Distribution	Transmission + Infrastructure
Order Size	Small	Large

New Capabilities:

- High voltage transformer manufacturing
- Large power transformer execution
- Transmission project capability
- Data centers & industrial applications
- Faster execution scale

Expected Business Impact:

- Higher revenue potential
- Entry into high-margin segment
- Larger order eligibility
- Lower competitive intensity
- Improved operating leverage

Revenue Potential at Full Capacity: **500–550 Cr**

Order Book

₹ 88.13 Cr

As on August 13, 2026

High Entry Barrier Segment

- 
- Capability up to **200 MVA / 220 kV**
 - Limited competition in high-capacity transformers
 - Qualification-driven & approval-based market

Integrated Manufacturing Advantage

- 
- End-to-end in-house production & testing
 - Faster execution & quality control
 - Cost efficiency vs outsourced models

Strong EPC & Utility Relationships

- 
- Established vendor base with utilities
 - Repeat orders from EPC contractors
 - Multi-year relationship-driven business

Scalable Capacity Platform

- 
- **3.5x capacity expansion (2,500 → 9,000 MVA)**
 - Ability to execute larger, high-value projects
 - Ready for demand upcycle

Diversified End-Use Presence

- 
- Power generation, transmission & distribution
 - Renewable energy (solar & wind)
 - Industrial & infrastructure sectors

Execution Capability & Group Support

- 
- Backed by **Danya Electric (90% subsidiary)**
 - Enhanced execution capacity & flexibility
 - Supports higher order volumes

SPEL's strategy is focused on scaling operations, entering higher-value transformer segments, expanding geographically, and improving margins through better product mix and operational efficiency

Shift Towards High-Capacity Transformers

Focus on higher MVA and kV transformers to participate in large transmission and infrastructure projects

Geographic Expansion Across India

Expanding beyond Tamil Nadu into key states to widen market reach and order pipeline

Increase Private Sector Mix

Focus on EPC, industrial, and private clients to improve working capital efficiency

Scale Up Order Size & Revenue Visibility

Enhanced capacity to execute larger contracts and improve average order size

Leverage Renewable Energy Opportunity

Targeting solar and wind segments driven by grid integration and power evacuation demand

Margin Expansion Through Product Mix

Targeting solar and wind segments driven by grid integration and power evacuation demand

Explore Export Markets

Evaluating international opportunities as part of long-term growth strategy

Risk

Customer Concentration (EPC & Utilities)

Working Capital Intensity

Raw Material Price Volatility (Copper, Steel, CRGO)

Execution Delays

Industry Cyclicalities (Power Capex)

Scale-Up Risk (New Kannur Facility)

Competitive Intensity

Mitigation

Diversifying into private sector & industrial clients

Improving customer mix & tightening execution cycles

Pass-through clauses & strategic sourcing

In-house manufacturing + support from Danya Electric

Exposure to renewables, industrial & infra segments

Phased ramp-up & experienced execution team

Focus on high-MVA segment & strong EPC relationships

Renewable Energy Target

500 GW by 2030 (Non-fossil)

Transformer Market Growth

~8–10% CAGR
Driven by T&D expansion, renewable integration, & rising power demand

Capacity Augmentation Boosts Demand

India’s power-generation target is estimated to be 1,900 BUs in FY25, up from 1,738.828 BUs of actual generation in FY24.

Industrial sector is the largest consumer of energy consuming about 50% of the total commercial energy produced in the country followed by the transport sector.

Attractive Opportunities

The Union Budget 2026-27 has allocated ₹1,775 crore to the Solar Power (Grid) segment, up from ₹1,500 crore in Budget Estimates for FY26, reinforcing India’s continued commitment to accelerating the renewable energy transition.

To meet India’s 500 GW renewable energy target and tackle the annual issue of coal demand supply mismatch, the Ministry of Power has identified 81 thermal units which will replace coal with renewable energy generation by 2026.

Installed Energy Capacity (GW)

Energy Requirement (BU)

- India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of ~552 GW as of July 31, 2026.
- Renewable energy contributions include 85.47 GW from solar, 46.65 GW from wind, and 46.93 GW from hydro.
- Power generation increased by ~0.99% in FY26 to 1,845 billion kWh, compared to 1,829.70 billion kWh in FY25.
- The Union Budget 2026-27 has allocated ₹1,775 crore to the Solar Power (Grid) segment, up from ₹1,500 crore in FY26, reinforcing India's continued push towards expanding grid-connected solar capacity and accelerating the renewable energy transition.
- Peak power demand reached 270.82 GW in May 2026, reflecting growing electricity needs.
- Government schemes like DDUGJY, UDAY, and IPDS are accelerating electrification and infrastructure upgrades.
- SPEL's Plans for the expanded capacity from 2,500 MVA to 9,000 MVA and advanced solutions position it to meet the growing demand for power equipment.

3+ decades experience with strong EPC contractor & state utility relationships

Capacity expansion to ~9,000 MVA enabling larger, higher-value project participation

Entry into 200 MVA / 220 kV segment with relatively lower competition

Integrated in-house manufacturing ensuring quality, cost efficiency & faster execution

Healthy order book providing strong medium-term revenue visibility

Weaknesses

Working capital intensive due to project-based execution model

Dependence on EPC contractors & government utilities affecting cash flow cycles

Geographic concentration primarily in South India

Smaller scale compared to larger established transformer players

SWOT

Opportunities

Strong capex growth in transmission, distribution & renewable energy sectors in India

Shift towards high-capacity transformers supporting margin expansion

Increasing private sector & industrial client contribution improving business mix

Rising demand from AI-led data centres driving need for high-capacity power infrastructure

Threats

Volatility in copper & CRGO steel prices impacting margins

Execution risks and delays in large-value projects affecting profitability

Cyclicality in power sector capex and order inflows

Competition from large players with stronger balance sheets

Execution & ramp-up risks in new high-capacity facility
