SUMMARY OF OUR INDUSTRY

POWER SECTOR

Power is among the most critical components of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate power infrastructure is essential for sustained growth of the Indian economy. The fundamental principle of India’s power industry has been to provide universal access to affordable power in a sustainable way. The Ministry of Power has made significant efforts over the past few years to turn the country from one with a power shortage to one with a surplus by establishing a single national grid, fortifying the distribution network, and achieving universal household electrification.

India’s power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power, to viable non-conventional sources such as wind, solar, agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

- India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of 416.59 GW as of April 30, 2023.
- As of April 30, 2023, India's installed renewable energy capacity (including hydro) stood at 172.54 GW, representing 41.4% of the overall installed power capacity. Solar energy contributed 67.07 GW, followed by 42.86 GW from wind power, 10.24 GW from biomass, 4.94 GW from small hydropower, 0.55 from waste to energy, and 46.85 GW from hydropower.
- The non-hydro renewable energy capacity addition stood at 4.2 GW for the first three months of FY23 against 2.6 GW for the first three months of FY22.
- India's power generation witnessed its highest growth rate in over 30 years in FY23. Power generation in India increased by 8.87% to 1,624.15 billion kilowatt-hours (kWh) in FY23.
- According to data from the Ministry of Power, India's power consumption stood at 130.57 BU in April, 2023.

- The peak power demand in the country stood at 226.87 GW in April, 2023.
- The coal plants registered a PLF of 73.7% for the first nine-months period in FY23 compared to 68.5% in FY22 for the same period.
- Thermal power plant load is estimated to improve by 63% in FY24, fuelled by strong demand growth along with subdued capacity addition in the sector

SECTION III- RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties summarized below, before making an investment in our Equity Shares. The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page numbers 114 and 246, respectively, of this Red Herring Prospectus as well as the other financial and statistical information contained in this Red Herring Prospectus. Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “Financial Information, as Restated” beginning on page number 182 of this Red Herring Prospectus.

If any one or more of the following risks as well as other risks and uncertainties discussed in the Red Herring Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects, and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Materiality

The Risk factors have been determined based on their materiality, which has been decided based on following factors:

Classification of Risk Factors

Internal Risk Factors

1. *Our present promoters of the Company are first generation entrepreneur.*

Our present Promoters are first generation entrepreneurs. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience and we cannot assure that this will not affect our business growth. However our promoters have experience of more than 40 years cumulatively. Investors and stakeholders may be more cautious when the entrepreneurs belong to first generation. This could affect the ability to secure funding or partnerships that are critical for growth. Established entrepreneurs often have extensive networks within their industries, which can be invaluable for partnerships, collaborations, and accessing resources. First-generation entrepreneurs may have limited connections, making it more challenging to tap into these opportunities.

3. ***One of our objects of the issue includes Capital expenditure, which will take a period of twelve months for set up.***

The establishment of a manufacturing setup is a complex and time-consuming process that can indeed take a significant amount of time, often spanning 12 months or more. During this period, there are several risks and challenges that can potentially arise, including cost overruns and escalation of expenses.

1. **Cost Overrun:**

- **Unforeseen Expenses:** During the setup phase, various unforeseen expenses can emerge. These may include unexpected regulatory compliance costs, delays in obtaining permits, or unforeseen technical challenges. These unanticipated costs can lead to a significant increase in the overall project budget.
- **Inaccurate Initial Budgeting:** Sometimes, initial budget estimates may not fully account for all the necessary expenses. As the project progresses, it becomes evident that additional funds are required to complete the setup. This can strain the financial resources of the company.

2. **Escalation of Expenses:**

- **Material and Labor Costs:** The cost of raw materials, equipment, and labor can fluctuate over time. Inflation, changes in market conditions, or supply chain disruptions can lead to increased costs. If the setup project takes longer than initially planned, these escalating expenses can impact the overall budget.
- **Regulatory Changes:** Regulatory requirements can change over time, necessitating modifications to the manufacturing setup to ensure compliance. These changes can lead to increased costs, especially if they require retrofitting or redesigning aspects of the setup.

For details of the funds utilization for IPO, please refer the page no.76 of the chapter “Object of the Issue”.

4. ***We will be required to obtain certain licenses for set up of new factory. If we do not receive these licenses within time, it will hamper the business operations and we may face operational disruptions.***

One of our objects of the issue includes Capital expenditure, the details of which are given in the chapter “Objects of the Issue” beginning on page no. 76. For starting the operations of the new factory, we will be required to obtain certain licenses which includes but not limited to factory license, Fire Service License. In case of non receipt of these licenses, we may face severe legal, financial, operational, and safety risks.

Operating without the necessary licenses can lead to substantial fines and penalties imposed by regulatory authorities. These fines can accumulate over time, significantly impacting the financial health of the business. On the other hand, Regulatory bodies may take legal action against the company and the authorities have the power to shut down the factory if it operates without proper licenses. This can halt production, disrupt supply chains, and lead to financial losses which includes increased costs, such as paying higher fines, legal fees, and compensations in case of accidents.

Further, operating illegally can tarnish the company's reputation. Customers, suppliers, and partners may lose trust in the business, affecting long-term relationships and brand value. This can lead to a financial crisis for the that unit of the business.

5. ***The Pre-IPO shareholding of the promoters and promoter group is 79.37% and the post-IPO shareholding will remain 56.56%. The market's perception of their reduced involvement may impact the valuation and liquidity of their shares.***

As on the date of this Red Herring Prospectus, the shareholding of the promoters and promoter group is 79.37% and after IPO, their shareholding will be 56.56%. When the promoters' ownership stake is reduced to a minority position, they may no longer have the ability to make key strategic decisions or influence the direction of the company. This can result in a loss of control over the business. In addition to this, a low promoter shareholding can create a misalignment of interests between the promoters and other shareholders which can lead to conflicts and disagreements over the company's strategy and priorities.

For more details of the shareholding of the company, please refer to the chapter “Capital Structure” beginning on page no. 57.

6. ***We do not have long term contracts with our suppliers and therefore, there may be potential unavailability of raw materials in future, which may adversely affect our business operations.***

Our ability to manufacture and make timely deliveries of our products is dependent upon the availability of raw materials and the cost incurred over them.

Our consolidated raw material expenditure for the following period are as follows:

(Amount in Lakhs, except %)

Particulars	For the period ended on July 31, 2023	For the year ended on March 2023	For the year ended on March 2022	For the year ended on March 2021

% from Revenue from operation	78.94%	76.82%	87.43%	85.47%

We generally do not enter into agreements with our suppliers and transact with them on an order-by-order basis, and we cannot assure you that we will continue to enjoy undisrupted relationships with our suppliers in the future. We cannot assure you that we will be able to procure such specific raw materials in a timely manner or at commercially acceptable terms, or at all, resulting in delays in production and delivery of our products.

If we are unable to obtain adequate supplies of raw materials in a timely manner or on commercially acceptable terms, the cost of raw material consumption can increase, which could have an adverse effect on our business, prospects, results of operations and financial condition.

7. ***Our Company operation and growth is dependent upon successfully implementation our business strategies.***

The success of our business depends substantially on our ability to implement our business strategies effectively, like expansion of our product range with a focus on value added products. We have successfully executed our business strategies in the past but there can be no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

8. ***Our Company has negative cash flows from its operating, investing activities and financing activities in the current and past years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Our Company had negative cash flows from our operating activities in previous year, investing activities (largely due to purchase of investments and of fixed assets, including intangible assets) in the current and previous years and financing activities in the current and previous years as per the Restated Financial Statements and the same are summarized as under.

9. ***We have obtained some of our contracts through government tenders, unavailability or any failure to secure these tenders in the future may adversely affect our business operations and financial conditions.***

Our Company generates a significant portion of revenue constituting approximately 60-80% from the contracts through government tenders.

10. ***Our business operations are subject to various operating risks at our sites, accidental risk, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.***

Our business operations are subject to operating risks, such as breakdown or failure of plant & machineries and equipments used at the sites, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, and labour disputes. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

Further, usage of machinery, handling of materials by labour during manufacturing process, testing of electrical equipments or otherwise, lifting of materials by humans, etc. may result in accidents, which could cause injury to our labours, employees, other persons on the site and could also damage our properties thereby affecting our operations. Occurrence of accidents could hamper our manufacturing process and consequently affect our profitability.

11. The majority of our revenue primarily comes from the state of Tamil Nadu in terms of geographical distribution.

As on date of this Red Herring Prospectus, our revenue from operations are sourced from Tamil Nadu only. Relying heavily on revenue from one state can expose a company to various risks, primarily related to geographical concentration. Economic instability in the state can have a direct and immediate negative effect on your business. In addition to this, there may be limitations to market growth, depending on the size and population of the state which can lead to intense local competition to maintain market share and pricing power, potentially leading to margin pressure.

12. Our top ten customers contribute significant portion of our revenues during the current and previous financial years. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Following are the details of the revenue, our Company has generated from its Top 10 Customers:

(Amount in Lakhs, except %)

Particulars	For the period ending on July 31, 2023	For the period ending on March 31, 2023	For the period ending on March 31, 2022	For the period ending on March 31, 2021

Revenue from operations	3,429.34	7,553.03	4,660.47	3,535.17

**Standalone figures*

Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

13. Our inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our business operations & profitability. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors such as availability of resources, timeline, stakeholder involvement, and budget. If such factors are not effectively considered and utilized during project execution, it can have a negative impact on the project and its outcomes, which may affect our business and results of operations.

15. Our company unable to work on its full potential and utilized its full capacity for the production and manufacturing of products.

As our company is into the manufacturing business, utilisation of its full capacity is very important to maximize the efficiency and profitability of our business.

The details of capacity utilisation by our Company in the past periods are shown below:

Description	Particulars	UOM	31st July 2023	31st March 2023	31st March 2022	31st March 2021

The trend shows that our manufacturing facilities are not operating at optimum capacity utilization and there can be no assurance that we will be successful in achieving such utilization levels. Further, if we are unable to utilise our full capacity, that may affect the results of operations and financial conditions.

Further the “Objects of the Issue” as given on the page no 76 of this Red Herring Prospectus includes capital expenditure in which we intend to setup a plant at Kannur. We have not reached the maximum utilization of our existing capacity, however we are setting up a new plant. If the present trend of current utilization continues we may not be able to utilize the manufacturing capacity of the new plant.

16. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles “Objects of the Issue”.*

These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency and the audit committee of the Company will monitor the deployment of funds and provide disclosure for the same as per applicable provisions. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter Objects of the Issue will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.”

18. *Our major revenue is sourced from sale of our products which is transformers. Our inability or failure to manage and attract more clients in this regards could adversely affect our business.*

A major portion of our business revenue is derived from the sales of product which is transformers. If there is a disruption in the form of new technology in the manufacturing of transformers then it may lead to disruption in the business. If our company is unable to adapt to the new technology in a timely manner or if the demand for transformers and other heavy electrical goods does not grow faster enough or it takes longer to reach higher volumes than we anticipate, or if we are unable to get the government tenders which constitutes major portion of our revenue, our revenue may disrupt and thereby our business, operational and financial results may be adversely affected.

19. *Our Promoters, Directors have provided personal guarantees to loan facility availed by us, which if revoked may require alternative guarantees, repayment of amount due or termination of the facilities.*

Our company has taken secured loan by creation of hypothecation/mortgage over stock & book debts and vehicles, for which our promoters have given personal guarantee.

Our Promoters, Directors have provided personal guarantees to certain loan facilities availed by us. In the event that any of these guarantees are revoked or withdrawn, the lenders for such facility may require alternative guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facility. We may not be successful in procuring alternative guarantees satisfactory to the lender, and as a result may need to repay the outstanding amounts under such facility or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial conditions.

Additionally, our company has created charges over the Stock & Book Debts, Vehicle etc. in favour of our lenders to secure our indebtedness. In the event that any lender seeks the accelerated repayment of any such loan or seeks to, and is successful in, enforcing any other rights against us there could be a material adverse effect on our business, cash flows, financial condition and results of operations.

20. *Our profitability and business operations is significantly dependent on our ability to successfully anticipate the industry and client requirements. Any failure on our part to do so, may have an impact on our operations, which could have an adverse effect on our revenue, reputation, financial conditions, results of operations and cash flows.*

Our profitability, business operations and its success is significantly dependent on our ability to ensure continued demand for our products in existing and proposed markets, which requires us to continuously anticipate and respond in a timely manner to customer requirements and preferences. If we are unable to successfully anticipate customer requirements or are unable to modify our current portfolio of products or develop new products, in a timely manner, we may lose customers.

Though we are committed to product innovation to respond to changing technology in the electric equipment industry, there can be no assurance that we would be successful in developing new products that respond to such changes or changes in customer requirements and preferences or that our products would gain acceptance in our existing or new markets. Any enhancement to our existing offerings or new offerings that we develop and introduce involves significant commitment of time and resources and is subject to a number of risks and challenges including:

- ensuring the timely deployment of new offerings and features;
- adapting to emerging and evolving industry standards, technological developments by our competitors and changing client requirements;
- operating effectively with existing or newly-introduced technologies, systems, or applications of our existing and prospective clients.

The development of alternative technologies or a fundamental shift in technologies in key markets for our electric equipment could have an adverse effect on our business. Moreover, failure to correctly anticipate trends and adapt to the changing technological environment may result in reduced demand for our products which could have adverse effect on our revenue, reputation, financial conditions, results of operations and cash flows.

21. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future.*

While we believe that all our related party transactions have been conducted on an arm’s length basis as per the Companies Act, 2013, and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. The related party transactions are conducted on arm length basis and are in compliance as per the provisions of Companies Act, 2013. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.”

22. *We operate in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

We operate in a highly competitive market, with participants in the organized and the unorganized sectors. There are no entry barriers in our industry, which puts us to the threat of competition from new entrants. We face competition from other manufacturers, traders, suppliers and importers of electric equipment in relation to our offerings.

There are various principal factors affecting competition in our business which includes:

- Quality of the products and services Company offers
- Consumer preferences and demand
- Relationship with Clients
- Brand recognition and reputation in the market
- Pricing strategy
- timely delivery of the products and services.

In the event of inability to compete effectively in the market, this can increase competition in the market, lower our market share, reduce our operating margins and adversely affect our results of operations.

23. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as shareholders to the benefit and best interest of our Company, thereby adversely affecting our business and results of operations and prospects.

24. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risk.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively prevent and detect any frauds or misuse of funds. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may decline over time. There can be no assurance that additional deficiencies or lacks in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies or lacks in our internal controls. If internal control weaknesses are identified in a delayed manner, our actions may not be sufficient to correct such internal control weakness. Such instances may also adversely affect our reputation, thereby adversely impacting our business, results of operations and financial condition.

rights, which may expose us to expensive legal proceedings. If we are unsuccessful to defend ourselves against such claims in relation to use of intellectual property right, we may be subject to injunction and/or required to pay compensation which may adversely affect our business.

Further, we do not register any of the designs developed by us under the Designs Act, 2000 for any of our products. As such, it would be difficult for us to enforce our intellectual property rights in any of these designs or products, in the event our competitors or other companies in the electric equipment industry copy our designs or develop and market products manufactured using the same or similar technology as our electric equipment. Therefore, in case of failure to protect our intellectual property rights may adversely affect our business operation and financial conditions.

Though, we believe that we have obtained those certifications, permits and licenses which are adequate to run our business. There can be no assurance that the relevant authorities will issue or renew any of such certifications, permits or approvals in time or at all. This was followed by a fresh certificate of incorporation dated September 18, 2023. As a result of this conversion, we must update the name on all of our statutory approvals and certificates, including the PAN.

However, we cannot guarantee that we will be able to update all of these documents in a timely manner, in case of failure to update these documents could result in legal and financial complications, which may subject us to increased compliance costs, which may in turn result in an adverse effect on our financial condition.

28. *We are subject to stringent labour laws or other industry standards and any strike, work stoppage, Lock-out or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition and results of operations.*

Our manufacturing activities are labour-intensive. We are subject to a number of stringent labour laws that protect the interests of our workers. We have not experienced significant labour unrest in the past, strikes, lock-outs and other labour action but such may have an adverse impact on our operations, and if not resolved in a timely manner, could lead to disruptions in our operations. We cannot guarantee that we will not experience any strike, work stoppage, lock out or increased wage demand or other industrial action in the future and any such event could adversely affect our business, results of operation and financial condition.

29. *We are dependent on our promoters and our management team and the loss of, or our inability to hire, retain, train, and motivate qualified personnel could adversely affect our business, results of operations and financial condition.*

The loss of the services of our key personnel and any of our other executive officers, and our inability to find suitable replacements, could result in a decline in sales, delays in product development, and harm to our business and operations.

As on July 31, 2023 we have 61 employees. We cannot guarantee that we will be able to recruit and retain qualified and capable employees.

We may incur significant costs to attract and recruit skilled personnel, and we may lose new personnel to our competitors or other technology companies before we realise the benefit of our investment in recruiting and training them. If we fail to attract new personnel or fail to retain and motivate our current personnel who are capable of meeting our growing technical, operational, and managerial requirements on a timely basis or at all, our business may be adversely affected.

In accordance with Sections 13(8) and 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that require us to

undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be liable to provide an exit opportunity to shareholders who do not agree with our proposal to change the objects of the Issue or vary the terms of such contracts, at a price and manner as prescribed by SEBI. Additionally, the requirement of our Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the four months period ended July 31, 2023 and Fiscals 2023, 2022 and 2021 have been prepared in accordance with the Indian GAAP.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. Ind AS, US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

33. *Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.*

Our Company is involved in business transactions with international clients located globally and has to conduct the transactions in accordance with the rules and regulations prescribed under FEMA. Our international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it may adversely affect our business, results of operations, financial conditions and cash flows.

34. *Our Company has not paid any dividend in past 3 financials years and our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our Company has not declared dividends in the past and there can be no assurance that our Company will declare dividends in the future. For further details, please refer to the chapter titled "Dividend Policy" on pages 179 of this Red Herring Prospectus.

35. ***Industry information included in this Red Herring Prospectus has been derived from an industry report from various websites. The reliability on the forecasts of the reports could be incorrect and would significantly impact our operations.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

36. ***Our Company's future funding requirements, in the form of further issue of capital or other securities and/or loans that might be availed by us, may turn out to be prejudicial to the interest of the shareholders depending upon the terms and conditions on which they are raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

Issue Related Risk Factors

37. ***There are certain restrictions on daily movements in the price of Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Following the Issue, we will be subject to a daily circuit breaker imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

38. ***After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;

- Company's results of operations and financial performance;
- Performance of Company's competitors,
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts; and
- Significant developments in India's economic and fiscal policies;

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

39. Market price of our share will be decided by market forces and issue price of equity share may not be indicative of the market price of our share price after the issue.

After listing and trading permission of equity shares, the price of the shares shall be driven by free market forces. The market price of a company's share is determined by the forces of supply and demand in the stock market. These forces are influenced by a variety of factors, including the company's financial performance, industry trends, economic conditions, and investor sentiment.

When a company issues equity shares, it sets an issue price based on various factors such as the company's valuation, the prevailing market conditions, and the demand for its shares. However, the issue price is not necessarily indicative of the market price of the shares after the issue.

Once the shares are listed on the stock exchange, their price is determined by the forces of supply and demand in the market. If there is strong demand for the shares, the price may rise above the issue price, and if there is weak demand, the price may fall below the issue price.

Therefore, while the issue price of equity shares provides a starting point for the company's valuation, it is not necessarily a reliable indicator of the market price of the shares after the issue. Investors should carefully evaluate all relevant factors and information before making investment decisions in the stock market.

This space has been left blank intentionally.

External Risk Factors

40. *Outbreaks of contagious diseases, such as the recent outbreak of COVID-19, may have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.*

India experienced multiple waves of COVID-19 which had impacted global supply chains and resulted in shortages of materials and components used in the manufacturing operations and an inability to meet the manufacturing targets and this impact continues till date. The COVID-19 pandemic had resulted in restrictions on travel and transportation and prolonged closures of workplaces, businesses and schools, with employees being asked to work from home and citizens being advised to stay at home. Consequently, there was a significant disruption in attendance at the manufacturing facilities.

There can be no assurance that any future outbreak of contagious diseases will not have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

41. *Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

42. *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows.

43. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

44. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include STT, GST, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

45. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gain being long term capital gain amounting to upto one lakhs rupees provided Securities Transaction Tax ("STT") is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Details of Utilization of Issue Proceeds

Details of Utilization of Issue Proceeds

1. Capital Expenditure

Our Company intends to deploy Net Proceeds aggregating to Rs. 2,413.30 Lakhs towards Capital expenditure, which includes machinery for manufacturing of transformers and for setting up of second factory in the land owned by Company, details of which are as follows:

S. No.	Address (Survey No(s). of Kannur Village Thiruvallur Taluk)	Extent (in cents)
1	235/6A	97 (out of 99 cents)
2	235/8A	57
3	235/8B	30 (out of 51 cents)
4	235/7	52
5	235/9	87 ½ (out of 98 cents)
6	234/10	62
7	234/11	44
8	234/12A	39
9	234/13	126 ½ (out of 144 cents)
Total		5 Acres 95 Cents

Purpose of setting up second factory

The intended purpose of utilizing the proceeds from the IPO is to fund this capital expenditure, covering the setup of the new factory and the acquisition of plant and machinery required for manufacturing transformers with capacities up to 160 MVA. The company has been engaged in supplying transformers to government through tenders. In order to meet eligibility criterion and supplying transformers upto 160 MVA to government, we propose to set up a new factory. This strategic move aligns with the company's objective of diversifying its product range, enhancing eligibility for government tenders for supplying transformers upto 160 MVA, and ultimately driving growth. As of now, the company's manufacturing capabilities enables it to secure order for transformers with a capacity of up to 25 MVA.

Therefore, the allocation of IPO proceeds to establish a second factory is a strategic initiative to position the company for increased success in the market.

Utilities for functioning of second factory

The second factory's water needs for both human consumption and other purposes will be satisfied by a borewell, while the electricity supply will be sourced from the Tamil Nadu Generation and Distribution Corporation (TANGEDCO).

Description and Purpose of Machinery

We are primarily into the business of manufacturing of various transformers that cater various industries. For manufacturing of these transformers we need to set up the manufacturing plant which consists of various machinery as listed below. We have acquired a land as mentioned on page no. 114 in the Chapter “Our Business” where we intend to set up the manufacturing plant.

1. Building construction

It includes basic infrastructure for the setting up of plant for an area of 40,000 sq. ft. including but not limited to road, Sump, Flooring, Fire fighting System.

2. Impulse Voltage Test System

Impulse voltage is similar to Lightning strike, which creates a very high voltage in the atmosphere during thunder strikes. When transformers are installed outdoor in open area, they are likely to be exposed to such lightning high voltage strikes which have to be withstood by transformer without damage to the internal windings. Such high voltage conditions are stimulated by the impulse voltage systems and imposed on the transformer. The winding and insulation systems are monitored for proper withstanding of such high voltage conditions.

3. Winding Machines

Winding machines in transformer manufacturing are specialized pieces of equipment designed to wind the copper or aluminum conductors (windings) onto the core of a transformer. These machines are crucial for efficiently and accurately creating the primary and secondary windings of a transformer. The fundamental elements of a transformer encompass a magnetic core and copper windings serving as electrical conductors. Copper is sourced in the form of appropriately dimensioned strips, which are insulated with paper. These insulated copper strips are then arranged in a cylindrical configuration around the core. The process of winding these copper strips into a continuous coil is accomplished using coil winding machines. The internal diameter of each copper coil may vary, contingent upon the transformer's specific rating and design.

4. Hydraulic S Bend Tool

Hydraulic bending tools are used for various purposes related to the fabrication and assembly of transformer components. Transformer cores are often made of laminated sheets of electrical steel. Hydraulic bending tools can be used to shape and bend these steel sheets to create the core's desired geometry. Additionally, they may be used to shape and bend the copper or aluminum conductors used for the windings.

5. Former

Cylindrical formers with variable diameters are mounted on the winding machines and copper coil are wound on the formers as required. These winding machines are to be operated at low RPM and to be powerful to wind the copper strips.

6. VPD, Coil Drying System, Drying Oven

In the realm of transformers, the electrical insulation system primarily relies on paper and paper-based boards. During the manufacturing process of coils and the assembly of transformers, these paper insulations tend to absorb moisture from the ambient air, resulting in an increase in their water content due to atmospheric humidity. To ensure the reliable and long-lasting operation of transformers, it is imperative to reduce this water content in the insulation

to extremely low levels.

To achieve this, we will employ Vacuum Pressure Drying (VPD) systems. The VPD system consists of a chamber equipped with atmospheric control mechanisms. Within this chamber, coils and fully assembled transformers are carefully placed. The VPD system operates by creating a controlled vacuum and pressure environment inside the chamber. This controlled atmosphere leads to the generation of vapor, which subsequently facilitates the removal of humidity and excess moisture content from the coils and other insulation materials to the desired levels.

7. Diesel Generator

Change in Days	Days	-	-10	+8	+1	-2

Upon analysing this table, it becomes evident that the company has consistently maintained an inventory cycle of average of 90 days over the years. If we break down the findings for each fiscal year:

- **Fiscal Year 2020-21 (Inventory: Rs. 831.60 lakhs, Inventory Days: 93 days):** In this fiscal year, the company had an inventory of Rs. 831.60 lakhs, resulting in an inventory cycle of 93 days. This means it took the company an average of 93 days to sell its inventory.
- **Fiscal Year 2021-22 (Inventory: Rs. 979.96 lakhs, Inventory Days: 83 days):** The following fiscal year showed improvement, as the inventory cycle decreased to 83 days, even though the inventory value increased to Rs. 979.96 lakhs. This indicated improved efficiency in managing inventory turnover.
- **Fiscal Year 2022-23 (Inventory: Rs. 1,549.94 lakhs, Inventory Days: 91 days):** However, in the subsequent fiscal year, the inventory cycle increased to 91 days, despite a significant increase in inventory value to Rs. 1,549.94 lakhs. Notably, revenue also increased substantially from Rs. 4,670.92 lakhs to Rs. 7,790.13 lakhs during this period.
- **Stub Period as of July 31, 2023 (Inventory: Rs. 2,148.48 lakhs, Inventory Days: 92 days):** In the interim period ending on July 31, 2023, the company's inventory continued to grow, reaching Rs. 2,148.48 lakhs. Nevertheless, the inventory cycle remained consistent at 92 days, aligning with the revenue increase for this period.
- **Estimated Fiscal Year 2023-24 (Projected Inventory Days: 90 days) & Fiscal Year 2024-25 (Projected Inventory Days: 87 days):** Looking ahead, the company's estimated inventory cycle for fiscal year 2023-24 is expected to be around 90 days, with further improvement projected for fiscal year 2024-25 at 87 days. This suggests that the company intends to maintain an efficient 90-day inventory cycle in the upcoming years.

Thus, despite fluctuations in inventory cycle and inventory values over the years, it is evident that the company is committed to maintaining a 90-day inventory cycle. This strategy appears to align with the company's revenue growth and demonstrates its dedication to effective inventory management.

Trade Receivable	Days	163	140	118	123	105
Change in Days	Days	-	-23	-22	+5	-18

The data from table offers a comprehensive view of the company's Trade Receivables from fiscal year 2020-21 to fiscal year 2024-25. In fiscal year 2020-21, the company had Trade Receivables worth Rs. 1,575.12 lakhs, and over the next year, this figure grew to Rs. 1,787.39 lakhs. This upward trajectory continued, with a substantial increase to Rs. 2,446.89 lakhs by fiscal year 2022-23, and a significant surge to Rs. 3,461.77 lakhs by stub period 31st Stub period 31st July 2023. However, there was a slight decrease to Rs. 3,030.21 lakhs by fiscal year 2023-24.

In terms of changes in the Trade Receivables amount, there was a positive change of Rs. 212.27 lakhs between Fiscal year 2020-21 and Fiscal year 2021-22, followed by a substantial increase of Rs. 659.50 lakhs between Fiscal year 2021-22 and Fiscal year 2022-23. The stub period ending on July 31, 2023, marked a significant surge of Rs. 1,014.88 lakhs, but this was followed by a slight decline of Rs. 431.56 lakhs between Stub period 31st July 2023 and Fiscal year 2023-24.

It should be noted that the reason for decrease in fiscal year 2023-24 from stub period 31st July 2023 is due to one major reason i.e. company's decision to increase it's revenue from private sector which has better receivable days.

Another crucial metric, Trade Receivables Days (DSO), revealed the efficiency of receivables collection. DSO decreased from 163 days in fiscal year 2020-21 to 140 days in fiscal year 2021-22, indicating improved collections. Further efficiency was observed as DSO decreased to 118 days by fiscal year 2022-23. It stayed near about same lines at 123 days for stub period July 31, 2023. It further reduced to 105 days by fiscal year 2023-24.

If we look at the numbers, even though the amounts of trade receivables are increasing significantly, the number of days have been reducing consistently. Thus, this shows that the company's receivable days are on right trajectory and reducing with company adding more revenue from private sector players and better receivables from existing state government entities.

Other Current Assets

Other Current Assets include Advance payment of taxes & Other Current Assets

Particulars	UOM	March 31, 2021 (A)	March 31, 2022 (A)	March 31, 2023 (A)	Stub July 31, 2023 (A)	March 31, 2024 (E)
Other Current Assets	Rs. Lakhs	211.43	99.58	113.63	212.00	524.37
Change in Amount	Rs. Lakhs	-	(111.85)	14.05	98.37	312.37

The company's other current assets include Bill Discounting, Prepaid Expenses, Advance Taxes paid or receivable, Input Credit of taxes, Advance to Supplier & Other Receivables. In the fiscal year 2020-21, the company reported a relatively high balance in its Other Current Assets (OCA), amounting to Rs. 211.43 lakhs. This increase was primarily attributed to a substantial input tax credit of Rs. 111.94 lakhs that the company had available for utilization. This tax credit had accrued from the company's investments in raw materials and machinery.

For fiscal year 2021-22 to stub period July 31, 2023, from Rs. 99.58 lakhs to Rs. 212.00 lakhs, the majority of this increase in OCA was allocated towards advanced payments to suppliers and an uptick in advance tax payments, driven by the company's improved profitability.

Looking ahead, the company is gearing up for a significant growth trajectory through an Initial Public Offering (IPO) to raise funds. This anticipated IPO is expected to result in a substantial boost in the company's revenue. With this projected surge in revenue, profits are also expected to experience exponential growth. As the company

embarks on this expansion journey, it is likely that its Other Current Assets will also see an expansion.

The expected revenue and profit growth will necessitate increased advance tax payments and advanced payments to suppliers. These actions are aimed at securing more favorable pricing for raw materials. As a result, we anticipate that the balances in Other Current Assets will rise to Rs. 524.37 Lakhs in the fiscal years 2023-24. This strategic approach reflects the company's proactive efforts to manage its financial resources and support its growth plans effectively.

Trade Payables

Particulars	UOM	March 31, 2021 (A)	March 31, 2022 (A)	March 31, 2023 (A)	Stub July 31, 2023 (A)	March 31, 2024 (E)
Trade Payables	Rs. Lakhs	567.53	1,599.16	1,716.56	2,782.76	2,582.04
Change in Amount	Rs. Lakhs	-	1,031.63	117.40	1,066.21	(200.72)
Trade Payables	Days	63	135	100	119	112
Change in Days	Days	-	+72	-35	+19	-7

The data clearly highlights a substantial surge in trade payables during the fiscal year 2021-22, where they increased by approximately Rs. 1,031.63 Lakhs, rising from Rs. 567.53 Lakhs to Rs. 1,599.16 Lakhs. This notable increase can be attributed to the reduction in short-term borrowings, as available cash flow was directed towards repaying short-term debts, resulting in an increase in payables.

Another significant uptick in creditors is observed during the stub period ending on July 31, 2023, amounting to Rs. 1,066.21 Lakhs. This increase is primarily driven by a significant rise in revenue during the same period, leading to a proportional increase in relative operating expenses. Notably, the revenue generated during this stub period, totaling Rs. 3,525.95 Lakhs, accounts for approximately 50% of the total revenue for the full fiscal year 2022-23, which is Rs. 7,790.13 Lakhs. This trend is expected to continue in the estimated periods, with trade payables projected to be at Rs. 2,582.04 Lakhs for fiscal year 2023-24.

Examining the trade payable days, there was a significant increase in fiscal year 2021-22 due to the rise in creditors resulting from cash being allocated to the repayment of short-term borrowings. Consequently, trade payable days increased from 63 to 135. Subsequently, these days have remained within the range of 100-120 days. While they decreased to 100 days in fiscal year 2022-23, there was a slight increase to 119 days in the stub period ending on July 31, 2023. Projections indicate a reduction to 112 days in fiscal year 2023-24.

Short Term Borrowings

Particulars	UOM	March 31, 2021 (A)	March 31, 2022 (A)	March 31, 2023 (A)	Stub July 31, 2023 (A)	March 31, 2024 (E)
Short Term Borrowings	Rs. Lakhs	1,792.16	592.97	544.72	1,042.80	800.00
Change in Amount	Rs. Lakhs	-	-1,199.19	-48.25	498.08	-242.80
Short Term Borrowings	Days	200	50	32	45	35
Change in Days	Days	-	-150.00	-18.00	13.00	-10.00

The category of Short-Term Borrowings encompasses elements such as the current maturities of long-term debt, Bank Overdraft, and Short-Term Borrowings from Banks.

The data presented reveals a significant repayment of approximately Rs. 1,200 Lakhs during the fiscal year 2021-22. This repayment was made from the sanctioned bank limit allocated for working capital. In the subsequent fiscal year, 2022-23, the company maintained its borrowing levels at a consistent level. However, during the stub period ending on July 31, 2023, there was an increase of Rs. 498.08 lakhs in short-term borrowings. This increase can be attributed to an expansion of the company's sanctioned credit limits during this stub period.

Looking ahead, the company is preparing to reduce its reliance on working capital limits provided by banks. This shift is driven by the company's plan to raise the necessary working capital through an Initial Public Offering (IPO). Consequently, there is an expected decrease in short-term borrowings for fiscal year 2023-24 (estimated at Rs. 800 Lakhs). This strategic move reflects the company's intention to optimize its financial structure and minimize borrowing requirements from banks as it secures funds through its IPO.

Other Current Liabilities

Total	Rs. Lakhs	28.73	29.44	403.46	774.74	474.73

The above dataset states a notable upswing in Other Current Liabilities (OCL) and Provisions from fiscal year 2021-22 i.e. Rs. 29.44 Lakhs to fiscal year 2022-23 i.e. Rs. 403.46 Lakhs, with a continuation into the stub period ending on July 31, 2023 standing at Rs. 774.74 Lakhs. This increase is primarily attributed to two significant factors:

- Firstly, the company experienced an elevation in OCL and Provisions due to the receipt of higher advances from its customers, particularly from private entities. These advances typically stem from customers opting for advance payments, often balancing them against Letters of Credit (LC).
- Secondly, the company's augmented profitability led to an expansion in the provision for income tax. This increase in profits necessitated the allocation of more funds for income tax obligations, thereby contributing to the overall growth in OCL and Provisions during this period.
- Looking ahead, it is anticipated that for fiscal year 2023-24 (estimated at Rs. 474.73 lakhs) the amounts will likely remain within the range observed in fiscal year 2022-23. This projection is grounded in the company's improved operational management and the timely delivery of goods from new plant and machinery acquisitions, underscoring the company's commitment to effective financial management and operational efficiency.

GLOBAL OUTLOOK

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. Global growth is projected to slow significantly in the second half of this year, with weakness continuing in 2024. Inflation pressures persist, and tight monetary policy is expected to weigh substantially on activity. Recent banking sector stress in advanced economies will also likely dampen activity through more restrictive credit conditions. The possibility of more widespread bank turmoil and tighter monetary policy could result in even weaker global growth. Rising borrowing costs in advanced economies could lead to financial dislocations in the more vulnerable emerging market and developing economies (EMDEs).

The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter. However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, non-services sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in

major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

Acute stress in the banking sector has receded, but credit availability is tight. Thanks to the authorities' swift reaction, the March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse in Switzerland. Accordingly, since the April 2023 WEO, global financial conditions have eased, a sign that financial markets may have become less concerned about risks to financial stability coming from the banking sector. But tight monetary policy continues to put some banks under pressure, both directly (through higher costs of funding) and indirectly (by increasing credit risk).

Growth Slowing, with Shifting Composition

A. Contributions to global growth

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis. Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms.

Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

 Note: The Financial Conditions Index (FCI) is calculated using the latest available variables. The emerging market economy sample excludes Russia, Türkiye, and Ukraine. The index is designed to capture the pricing of risk. It incorporates various pricing indicators, including real house prices, but does not include balance sheet or credit growth metrics. For details, please see Online Annex 1.1 of the October 2018 Global Financial Stability Report (GFSR).

D. Global trade forecast

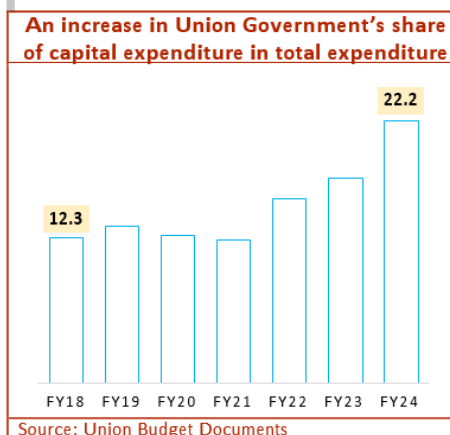

World trade growth is expected to decline from 5.2 percent in 2022 to 2.0 percent in 2023, before rising to 3.7 percent in 2024, well below the 2000–19 average of 4.9 percent. The decline in 2023 reflects not only the path of global demand, but also shifts in its composition toward domestic services, lagged effects of US dollar appreciation—which slows trade owing to the widespread invoicing of products in US dollars—and rising trade barriers.

INDIAN ECONOMY OVERVIEW

INDIAN OUTLOOK

Stronger-than-expected growth in the fourth quarter of FY23, driven by robust domestic investment, drove the International Monetary Fund (IMF) to revise India's real GDP growth forecast for FY24 upward by 20 basis points in its July 2023 World Economic Outlook (WEO). The robustness of domestic investment is the result of the government's continued emphasis on capital expenditure, which is expected to drive growth in the coming years. The Union Government in FY24 Budget increased the capital outlay by 33.3 per cent, raising the share of capital expenditure in total expenditure from 12.3 per cent in FY18 to 22.4 per cent in FY24. Measures implemented by the Union Government have also incentivized States to increase their capex spending. States capital expenditure increased by 74.3 per cent YoY in Q1 of FY24 to complement Centre's Capex increase of 59.1 % in the same quarter.

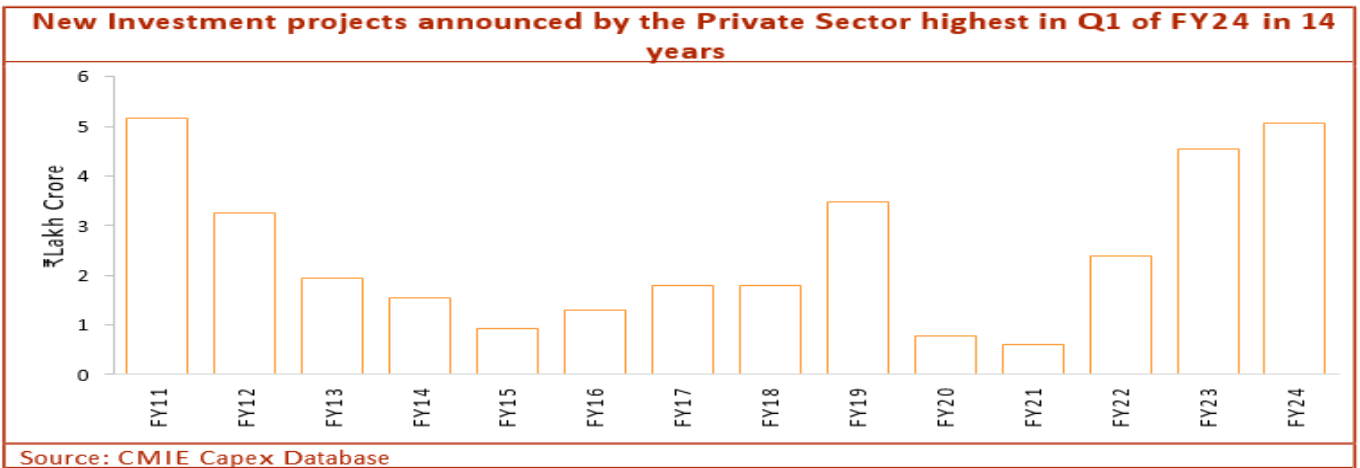

The early release of funds by the Centre to State governments under 'The Scheme for Special Assistance to States for Capital Investment' ensures that investments by States are spread evenly throughout the year, contributing to a substantial growth multiplier. Sustaining the capital expenditure growth by the States in the coming months, along with rationalization of revenue expenditure, will help them in achieving the overall fiscal deficit target of 3.5 per cent of GDP for FY24. The focus of the central government on capex also pushed its departmental arms and Central Public Sector Enterprises (CPSEs) to accelerate their capital expenditure.

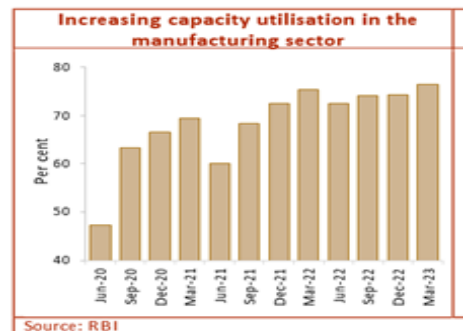

The data released by the Controller and Auditor General (CAG) for 23 States (which roughly account for 92 per cent of the Union Budget size of all the States) reflects that their capital expenditure has jumped by 74.3 per cent in Q1 of FY24, compared to the corresponding period of the previous year. Out of ₹1.3 lakh crore interest-free loans for States for FY24, a sum of ₹600 billion has been sanctioned so far. Of this, ₹300 billion has been disbursed. Further, 54 large CPSEs and five departmental arms have collectively met around 35 per cent of their annual capex target of ₹7.3 lakh crore in Apr-Jul 2023.

Private Investment

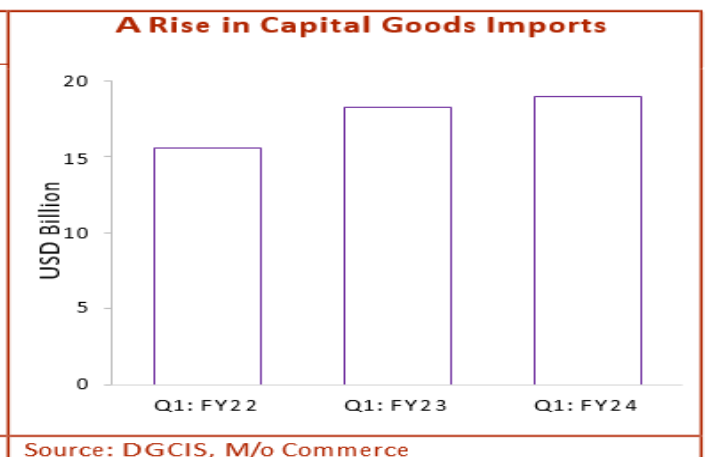

Realizing the importance of private investment in accelerating economic growth, the Government has been making various attempts to raise investment by the private sector. The Production-Linked Incentive (PLI) scheme is providing capital expenditure-linked incentives to 14 key sectors. The PM Gatishakti scheme, coupled with the National Infrastructure Pipeline (NIP), is expected to encourage private-sector participation in creating new infrastructure and help in onboarding major private-sector infrastructure players. Research by CRISIL highlights that the industrial investment by the private sector between FY18 and FY22 registered a CAGR of 7 per cent. This augurs well for still higher growth in the upcoming years.

As per RBI’s Order Books, Inventories and Capacity Utilization Survey, Capacity Utilization (CU) in the manufacturing sector increased for the third successive quarter to 76.3 per cent in Q4 of FY23 from 74.3 per cent recorded in the previous quarter. Bank credit to the infrastructure sector was 1.7 per cent higher in Q1 of FY24, compared to the corresponding period of the previous year, with the most remarkable increase in credit availability to cargo ports and airports. Higher capacity utilization along with double-digit growth in non-food bank credit signals positive intent of the private sector to undertake fresh investment going forward.

Enhanced provision for capital expenditure by the government is now leading to crowding in of private investment, as evident in the performance of various high-frequency indicators and industry reports which highlight the emergence of the green shoots of a private capex upcycle. The recent increase in capital expenditure of the Government is reflected in an increase in Gross Fixed Capital Formation (GFCF). GFCF as per cent of GDP (at Constant Prices) stood at 34 per cent in FY23, the highest since FY14. The increase in GFCF supported India’s GDP growth even during the uncertain global economic scenario. A study by CRISIL showcases that supported by an increase in Government spending; infrastructure capex is expected to register a compound annual growth rate (CAGR) of 11 per cent between FY23 and FY27, 67 per cent higher compared to CAGR between FY18 and FY22.

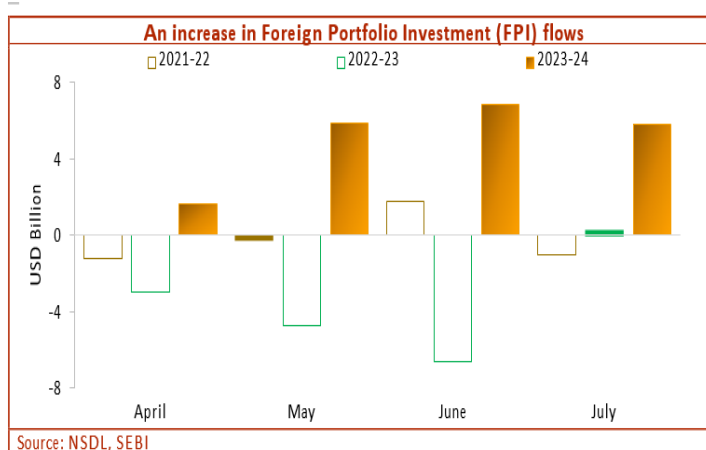

As per the data released in National Accounts Statistics 2021-22, GFCF by the Private sector rose from ₹17.4 lakh crore in FY18 to ₹23.7 lakh crore in FY22. Multiple high-frequency indicators and industry report point towards the emergence of the green shoots of a private capex upcycle. The IIP data shows that the capital goods index and infrastructure/construction goods index saw robust growth of 12.9 per cent and 8.4 per cent, respectively, in FY23.

The indices have carried forward their momentum thus far into FY24 and have grown by 6.5 per cent and 14.5 per cent, respectively, on a cumulative basis till May 2023. Robust investment activity is also evident in the increasing imports of capital goods, which grew by 20.3 per cent in FY23 and are up by 4.2 per cent on a YoY basis in Q1 of FY24.

Human Development

The robustness of India’s economic fundamentals is accompanied by strides made in human development. The recently released National Multidimensional Poverty Index Report by Niti Aayog demonstrates a remarkable decline in the prevalence of multidimensional poverty in India, attributable to the government’s strategic focus on achieving universal access to basic amenities. With the national MPI nearly halving between 2015-16 and 2019-21, India is likely to achieve the SDG Target on multidimensional poverty much ahead of the stipulated timeline of 2030. The results are reinforced by India-related findings in the Global MPI report by UNDP and OPHI. From an economic growth perspective, the 13.5 crore Indians escaping poverty between 2015-16 and 2019-21 and graduating to the middle class will boost the engine of self-sustained growth through consumption, savings, and human capital accumulation.

Foreign Investment

As a result of robust foreign inflows and a decline in imports, India’s foreign exchange reserves have strengthened over the past months and stood at USD 603.9 billion at the end of July 2023, sufficient to provide an import cover of more than 10 months. Persistent geopolitical concerns continue to shadow the world trade growth which is expected to decline to 2 per cent in 2023 from 5.2 per cent in 2022. Yet, India’s external sector has displayed resilience with strong services export growth and robust investment inflows highlighting investors’ confidence in India’s growth story.

Despite the weak global growth forecast, new avenues for India to expand exports can open up

The WEO (July 2023) expressed optimism about inflation coming down faster than expected, allowing for more liquidity through accommodative monetary policy, thereby spurring world demand and, thus, trade. Continued recovery in supply chains can complement this trend. For India, on the supply side, the RBI’s survey of the industrial outlook of the manufacturing sector suggests that it is expected that production, as well as exports, are likely to increase in Q2 of FY24. However, on the demand side, a review of the region-wise global growth forecasts for the year 2023 by the WEO, in light of India’s destination-wise export shares in FY23, suggests that demand for India’s exports is likely to be weaker during 2023 in line with the general forecast of a decline in global growth. However, the decoupling of trade between China and the United States can open up avenues for India to expand exports. (UNCTAD, Global Trade Update, June 2023).

A. Global supply chain pressures

ROAD AHEAD

Going forward, while domestic consumption and investment demand are expected to continue driving growth, global and regional uncertainties and domestic disruptions may keep inflationary pressures elevated for the coming months, warranting greater vigilance by Government and the RBI. Monsoon rains in August have been deficient at the time of writing. The government has already taken pre-emptive measures to restrain food inflation which, along with the arrival of fresh stock, is likely to subside price pressure in the market soon.

In the time to come, the PLI and new-age sectors (such as green hydrogen, semiconductors, wearables and solar modules) are expected to account for nearly 17 per cent of the capex between FY13 and FY27. The healthy balance sheet of the private sector, with increased capex by the government, is anticipated to increase the opportunities for the private sector to participate in myriad infrastructure initiatives such as highways, construction of new roads, housing, and drinking water projects, among others. The capacity utilization in the manufacturing sector is now above its long-run average, signaling the need for additional capacity creation as demand sustains the domestic economy. A pick-up in capex expenditure has ensured that infrastructure-linked sectors, such as roads, railways, telecom etc., have seen a jump in the disbursement of bank credit. Further, government has been opening up new avenues for private sector to participate and contribute further to growth.

The external sector requires monitoring for further strengthening the prospects in the face of active pursuit of industrial policies globally. Services exports continue to do well and are likely to continue doing so as the preference for remote working remains unabated, typically manifested in the proliferation of Global Capability Centers. At the same time, from a medium-term perspective, it is important to monitor the impact of new technologies, such as Artificial Intelligence, on the external demand for Indian services exports and the consequent impact on employment.

GLOBAL TRANSFORMER MARKET

Transformer Industry Analysis

Transformer Market size is valued at USD 54 billion in 2022 and is anticipated to grow at a CAGR of 7.2% between 2023 and 2032. Large scale integration of renewable energy sources coupled with increasing electrification programs primarily across the emerging economies will accelerate the industry scenario.

Favorable government policies for refurbishment of existing grid infrastructure along with growing consumer focus toward smart monitoring units and sustainable electricity networks will further drive the business growth. Increasing regulatory focus toward integration of energy efficient electricity supply systems in line with rapid adoption of smart grid technology will positively influence the industry dynamics.

Expanding urban infrastructure to proliferate product demand for commercial & industrial applications

Power transformer market from the commercial & industrial applications segment is expected to exhibit nearly 7% growth rate between 2023 and 2032. Transformers are a critical component in electrical systems distribution for commercial buildings as they efficiently modify voltage levels to deliver electrical loads based on their voltage requirements. The expanding commercial infrastructure supported by accelerating urbanization and rapid industrial growth will enhance segment share.

Novel innovations to stimulate the competitive landscape

Top companies operating in the global power transformer market are General Electric, Toshiba Energy Systems & Solutions Corporation, Hyosung Heavy Industries, Hyundai Electric & Energy Systems Co., Ltd., Schneider Electric, Mitsubishi Electric Corporation, WEG, CG Power & Industrial Solutions Ltd., Celme S.r.l, Kirloskar Electric Company, Daihen Corporation, Siemens Energy, Hammond Power Solutions, Bharat Heavy Electricals Limited, Grupo Comtrafo, Pfiffner Group, JSHP Transformer, Hitachi Energy Ltd., Hangzhou Qiantang River Electric Group Co., Ltd.(QRE), YueBian Electric Co., Ltd., and Bharat Bijlee Limited.

These leaders have been undertaking several R&D initiatives to offer efficient and reliable solutions and improve the existing transformer technology. For instance, in January 2022, General Electric launched a range of power transformers that support renewable energy. Transformers such as GE- Mistral-14, 275 KV to 400 kV, two 340 MVA large power transformers, and MBH Power are installed in numerous wind farm projects across several countries. The wide range of GE power transformers with different voltage levels finds applications in power generation, transmission, and distribution.

POWER SECTOR

Power is among the most critical components of infrastructure, crucial for the economic growth and welfare of nations. The existence and development of adequate power infrastructure is essential for sustained growth of the Indian economy. The fundamental principle of India's power industry has been to provide universal access to affordable power in a sustainable way. The Ministry of Power has made significant efforts over the past few years to turn the country from one with a power shortage to one with a surplus by establishing a single national grid, fortifying the distribution network, and achieving universal household electrification.

India's power sector is one of the most diversified in the world. Sources of power generation range from conventional sources such as coal, lignite, natural gas, oil, hydro and nuclear power, to viable non-conventional sources such as wind, solar, agricultural and domestic waste. Electricity demand in the country has increased rapidly and is expected to rise further in the years to come. In order to meet the increasing demand for electricity in the country, massive addition to the installed generating capacity is required.

- India is the third-largest producer and consumer of electricity worldwide, with an installed power capacity of 416.59 GW as of April 30, 2023.

Transformer Industry in India

The Indian transformer industry is more than five decades old, hence mature. Domestic manufacturers have developed capabilities to manufacture all types of equipment to meet the country's demand for transformers up to 800 Kilovolts (kV) and going up to 1,200 kV. The industry enjoys a good reputation in terms of quality, price, and delivery in the domestic as well as overseas markets.

India's transformer market is predominantly unorganized with many small participants catering to the smaller distribution transformer markets. However, many are slowly graduating to the medium-sized category, thus expanding the organized participants' base.

There are approximately 300+ transformer companies in India, with an overall installed capacity of over 370,000 Megavolt Amperes, (MVA) per annum. The market is fragmented with 20 organized players including Bharat Heavy Electricals Limited (BHEL), ABB Ltd, Crompton Greaves Ltd (CGL), Areva T&D, EMCO Ltd, Bharat Bijlee Ltd (BBL), Vijai Electricals, Transformers and Rectifiers India Limited (TRIL), Voltamp Transformers Ltd, among others.

In the power transformers category, companies in the high-end segment (400 kV and above) mainly include international players such as ABB Ltd, Alstom T&D (erstwhile Areva T&D India), and Siemens; and Indian manufacturers such as BHEL, CGL, TRIL, and Toshiba Transmission & Distribution Systems India (Entity formed by acquisition of Vijai Electricals by Toshiba Corporation, Japan). Majority of other companies in this sector are present in the 220 kV segment in power and distribution transformers. Leading players have significant presence in both power and distribution transformer market.

Apart from catering to domestic demand, India exports transformers to over 100 nations including the US, Europe, Malaysia, Singapore, Bangladesh, African countries, and Gulf countries. India is also an importer of transformers; the major source countries include China, Germany, USA, Korea, and Japan.

Indian Transformer Market Size

The Transformer market in India can be pegged at more than INR 12,000 Crores. Power Transformers contribute 45 percent of the total market and distribution transformers, 55 percent. Over the last two years, the market has grown at a very moderate rate at less than 4 percent, due to the slowdown of power generation capacity addition and T&D infrastructure expansion.

Anticipating the huge domestic (due to a power deficit scenario, requirement of power sector expansion) and overseas demand, the transformer industry in India has more than doubled its manufacturing capacity over the last five years. Transformer manufacturing capacity in India stands at ~370 GVA with capacity utilization rates hovering around 60-70 percent on an average over the last 5 years. Transformer over-capacity in the Indian market has led to immense pricing pressure scenario severely impacting the profitability of the market players.

New Entrants

India's huge power shortage, need to ramp up power T&D infrastructure, economic slowdown of developed markets like Europe and North America and excess transformer manufacturing capacity in China has resulted in India being an attractive destination for transformer companies globally to tap the Indian market opportunity.

Market Drivers

Power Generation Capacity augmentation and Power T&D infrastructure expansion to be in-line with Power generation capacity addition. According to the 12th plan, INR 1200K-1300K Crores likely to be invested in the power sector. This spending on the power sector is expected to be equally distributed between generation and T&D. Spending on Power T&D infrastructure is expected to boost demand for transformers.

Rajiv Gandhi Grameen Vidyutikaran Yojna (RGGVY) scheme to improve rural electricity infrastructure and rural household electrification. The electrification drive is expected to provide impetus to demand for distribution transformers.

Increasing focus on Rural Electrification Accelerated Power Development and Reform Program (APDRP 1-2) in order to minimize Aggregate Technical and Commercial (AT&C) losses at the distribution level and improve the financial health of the State Electricity Boards (SEBs)

Market Challenges

Inadequate supply of prime quality Cold Rolled Grain Oriented (CRGO) steel is the biggest challenge faced by transformer manufacturers in the country. CRGO requirement is completely met through imports; it is in fact challenging to assess the true quality of the material that is used by the transformer manufacturers in India. India needs 2.5 lakh tons of CRGO every year and an appalling 70 percent of this is scrap grade material.

Failure rate of Transformers – High failure rate of distribution transformers, is a big concern for the transformer industry in India. The average operational life of a transformer is between 25 to 30 years; however, transformers are known to be recalled for repair in as early as three years. The failure rate of distribution transformers in India is estimated at 10-15 percent (in stark contrast to the less than 2 percent failure rate in developing countries). This is due to the low entry barriers in the distribution transformer market leading to unorganized players entering the market, and competing on the price factor. SEBs historically follow a L1 vendor selection criteria, which has led to proliferation of many small players, that compromise on the quality of transformers manufactured.

Financial Condition of SEBs – SEBs have been facing losses due to the supply of subsidized power to agricultural farmers, theft of power, and inefficient T&D infrastructure. This has restricted private investment in the power T&D

sector, thereby reducing the quality of service from SEBs. This, in turn, is affecting the capacity building program and transmission of power.

Lack of testing facilities – The growth in testing infrastructure has not kept pace with that of production, both, quantitatively and qualitatively. Testing infrastructure available at India’s premier agency, the Central Power Research Institute (CPRI) is proving short of demand. Manufacturers of large power transformers at times need to send their equipment for testing to overseas facilities like Korea Electrotechnology Research Institute (KERI) and KEMA which is expensive. Apart from this, huge logistical costs and lead times are also involved.

Way Forward

The Indian power and distribution transformer markets are highly dependent on investments planned by the Government of India for the T&D segment and reform programmes like the Revised Accelerated Power Development and Reform Program and Rajiv Gandhi Grameen Vidyutikaran Yojna. These programmes, when fully implemented as scheduled, are expected to drive the demand for both power and distribution transformers.

The Government of India currently plans to strengthen transmission lines and create a National Grid interconnecting the five regions (northern, southern, eastern, western and north-eastern) through the creation of ‘Transmission Super Highways’ this is expected to drive the demand for higher-rated power transformers. With T&D companies actively striving to reduce Aggregate Technical and Commercial (AT&C) losses, the demand for energy-efficient transformers would get a boost.

With huge investments proposed across sectors such as power, infrastructure, etc., the transformers market in India is slated for strong growth. The excess capacity in the Transformer industry in India, and entry of new players is further expected to increase market competitiveness. Market consolidation over the next few years is inevitable.

OUR BUSINESS PROCESS:

Our majority of business take place from participating in government tenders. In addition to this, we also receive orders from private entities or parties who are in need of transformers. The process of securing business through government tenders and from private entities or parties are distinct and can be described as follows:

- **BIDDING PROCESS FOR GOVERNMENT TENDERS:**
 1. **Publication of Tender Announcement:** The tender announcement is prominently featured on the official website i.e., <https://tntenders.gov.in/nicgep/app>, of our local electric utility - TANGEDCO / TANTRANSCO serving as the primary avenue for disseminating crucial information related to the procurement process.
 2. **Internal Deliberation and Evaluation:** Prior to committing to participation, a rigorous internal deliberation process is initiated. This involves a comprehensive evaluation of the organization's capacity, resources, and alignment with the tender's specific requirements.
 3. **Pre-Bid Qualification Criteria:** The tender imposes specific pre-bid qualification criteria:
 - a. **BIS License Compliance:** Prospective bidders are mandated to possess a valid license from the Bureau of Indian Standards (B.I.S.), a governmental authority, ensuring their ability to supply distribution transformers that conform to IS : 1180 (Part - I).

b. **Actual Manufacturer Status:** A fundamental requirement is that bidders must establish their status as actual manufacturers of Distribution Transformers. Substantiating documentation, such as Udyam Registration Certificates, is obligatory.

c. **Track Record of Supply:** Bidders must demonstrate a track record of supplying a minimum specified quantity of the specified transformer capacity, encompassing higher KVA capacity and higher KV rating, to entities such as State Electricity Boards, Power Utilities, TANGEDCO, TANTRANSOCO, or TNEB, over the preceding ten years.

d. **Financial Viability:** Bidders are expected to furnish evidence of financial viability, with an annual turnover exceeding a specified amount during any one of the preceding three financial years. Such evidence may consist of attested copies of Audited Financial Statements along with Chartered Accountant Certificate.

e. **Test Reports from Accredited Labs:** Comprehensive attested copies of Type Test reports and special test reports, procured from independent, NABL-accredited laboratories like CPRI, ERDA, among others, are mandatory for the specified capacity of distribution transformers.

4. **Bid Submission Post Pre-Bid Compliance:** Once all the stipulated pre-bid requirements are satisfied, the organization is primed to initiate the bid submission process. This entails crafting and submitting a comprehensive bid package, inclusive of all requisite documents, qualifications, and information specified by the tendering authority.

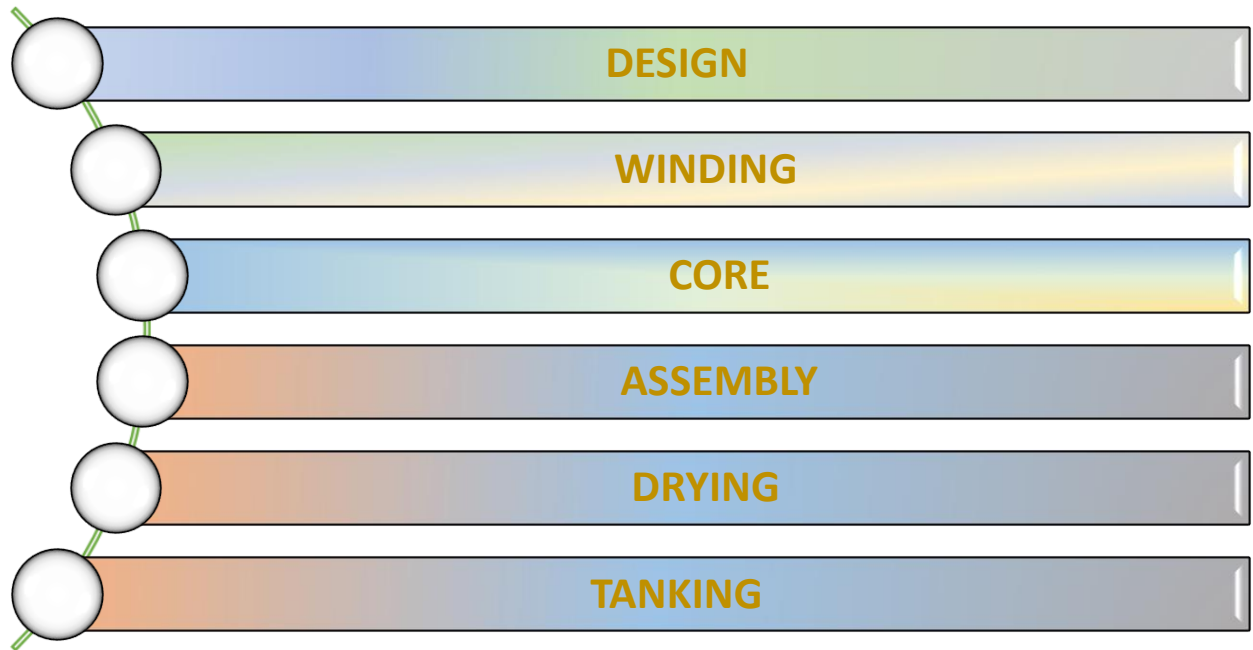

Thorough adherence to the tender notice's particulars, observance of stipulated deadlines, and scrupulous compliance with submission guidelines are paramount in ensuring a successful bid.

- **ORDERS FROM PRIVATE ENTITIES OR PARTIES:**

1. **Initial Inquiry:** Customers send initial inquiries to the company's marketing department specifying a brief overview of their requirements.
2. **Request for Quotation:** After initial inquiries and discussion, they submit a formal Request for Quotation (RFQ). The RFQ includes detailed specifications of the transformers, quantity, delivery timelines, and any other relevant details.
3. **Evaluation of Proposal:** Customers review the proposals or quotations as provided by us.
4. **Place an Order:** After considering factors such as pricing, delivery time, quality standards, company's reputation and after being satisfied they place order in accordance with the agreed-upon terms and conditions.

6. **Delivery and Installation:** After manufacturing, delivery and installation of transformers is being done by coordinating with customers and in accordance with the agreed-upon schedule.

OUR MANUFACTURING PROCESS

Our manufacturing process for transformers is as follows:

1. **Design:** Design is centre to operations at Supreme Power. Qualified designers evaluate the requirements and generate Transformer designs to comply with the individual needs of the customer. Design department also does review, verification and validation of its designs periodically.
2. **Core:** Core lies at the heart of transformer design in terms of electrical, mechanical and thermal point of view. Supreme uses a wide range of high quality CRGO steel laminations. The core critically determines factors such as iron losses, vibration, sound levels and firm of stability. Hence much care is taken during stacking of laminations.
3. **Winding:** The windings must be electrically and mechanically strong to withstand over voltages under transient surges and mechanical stress during short circuit. Different type of windings manufactured in Supreme are Cross over winding, Spiral Winding, Helical Winding, Continuous Disc winding and Interleaved Disc Winding. Choice of winding is largely determined by voltage of the winding. Work is carried out in environment where necessary precaution is taken to avoid contamination. Electrical Grade copper with high conductivity is used for windings. Special kraft paper with high dielectric strength is used for Winding insulation.
4. **Assembly:** The presence of moisture in insulation materials like paper and press boards brings about a reduction in the dielectric strength of the material. Drying process is carried out to remove all moisture absorbed in paper and press boards. Drying is carried out in two stages before core assembly and before tanking to ensure complete removal of moisture.
5. **Drying:** The drying process in transformer manufacturing is a critical step to ensure the long-term reliability and performance of transformers, particularly power transformers. This process primarily focuses on the removal of moisture or humidity from various components within the transformer. Moisture can lead to insulation breakdown, reduced dielectric strength, and a higher risk of electrical failures.
6. **Tanking:** The tanking process in transformer manufacturing is a crucial step in constructing the enclosure that houses the core, coils, and insulation components of the transformer. This process involves the assembly

of the tank and its associated accessories, ultimately providing a secure and protective housing for the transformer's critical components. The tank's design varies based on the transformer's size, type, and intended application. It must be robust enough to withstand the transformer's weight and provide protection against environmental factors such as moisture, dust, and corrosive agents.

FOLLOWING TESTS ARE CONDUCTED AT SUPREME'S PREMISES:

NO LOAD LOSS & NO LOAD CURRENT MEASUREMENT

The no-load loss and current measurements of a transformer are made while one of the windings (usually the HV winding) is kept open and the other winding is supplied at the rated voltage and frequency. During this test the no-load current (I_o) and the no-load losses (P_o) are measured.

RESISTANCE MEASUREMENT

Transformer resistance measurement is an image of the copper length of a given winding, and the quality of the contacts, present on the electrical circuit.

RATIO TEST

Transformer Turns Ratio (TTR) is one of the most common test used to assess the condition of the transformer's windings and core. It is performed as a part of acceptance and maintenance test procedure to determine any problems due to poor design, assembly, handling, overloading, fault conditions or poor maintenance.

INSULATION RESISTANCE VALUE MEASUREMENT

Measuring the insulation resistance of a transformer is a fundamental diagnostic test to assess the health of the transformer's insulation system. Regular testing helps to detect potential issues early, allowing for timely maintenance or repairs to prevent electrical failures and ensure the transformer's continued safe and reliable operation.

DIELECTRIC TESTS

The purpose of dielectric test is to determine the breakdown voltage at weak spots caused by the dielectric effects of any kind. It is the test to check compliance with the electrical safety testing standards and which verifies whether the insulation of a component sufficiently protects users from electrical shock.

PRESSURE TEST

Pressure testing for transformers is an essential part of ensuring their reliability and safety in electrical power systems. Transformers are critical components that step up or step down voltage levels in power distribution and transmission. Pressure tests are conducted to check the quantity of oil-filled tanks, and other components.

VECTOR GROUP TEST

The vector group test is crucial for ensuring that transformers are connected correctly in a power system. If there are discrepancies between the expected and observed vector groups, corrective actions may be necessary, such as reconfiguring the transformer. Proper vector group identification is essential for the reliable and efficient operation of transformers in electrical networks.

NOISE LEVEL MEASUREMENT

Measuring noise levels in transformers is an important aspect of transformer maintenance and assessment, especially in settings where noise pollution or abnormal noise can indicate potential issues within the transformer. Excessive noise can be a sign of mechanical or electrical problems.

TEMPERATURE RISE TEST

A Temperature Rise Test is a crucial procedure conducted on transformers to evaluate their thermal performance and ensure that they can operate safely and efficiently under load conditions. This test is essential to determine how much the transformer's temperature increases when subjected to its rated load.

CAPACITANCE & TAN DELTA TEST

The Capacitance and Tan Delta (also known as Dissipation Factor) test is an important electrical test conducted on transformers to assess the condition of the insulation system. This test helps in evaluating the dielectric properties of the insulation and detecting any potential issues or degradation.

HARMONICS MEASUREMENTS

Harmonics Measurements Test for transformers is a diagnostic procedure that assesses the harmonic distortion in the output voltage and current waveforms of a transformer. It is important because excessive harmonics can lead to increased losses, reduced efficiency, and additional stress on the transformer and other connected equipment.

ZERO SEQUENCE IMPEDANCE TEST

The Zero Sequence Impedance Test is an electrical test performed on transformers to determine the impedance of the transformer with respect to zero sequence currents. Zero sequence currents are those currents that flow in a set of conductors simultaneously and in the same direction, such as ground faults or unbalanced loads. Measuring the zero sequence impedance is important for assessing the transformer's ability to handle unbalanced or ground fault conditions in a power system.

STATEMENT OF PROVISION FOR GRATUITY AS RESTATED

Gratuity - The Present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

Interest cost: It is the increase in the Plan liability over the accounting period resulting from the operation of the actuarial assumption of the interest rate.

Current Service Cost: is the discounted present value of the benefits from the Plan's benefit formula attributable to the services rendered by employees during the accounting period.

PHASED IMPLEMENTATION OF UNIFIED PAYMENTS INTERFACE

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a. Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual applicant, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the

purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

- b. Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.
- c. Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering the facility of making applications in public issues are required to provide a facility to make applications using the UPI Mechanism. Further, in accordance with the UPI Circulars, our Company has appointed [●] as the Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI mechanism.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to Rs. 5,00,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than Rs. 200,000 and up to Rs. 5,00,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.
